TOMCAT

Download Tomcat https://tomcat.apache.org/download-80.cgi

Extract Tomcat folder

open bin folder

Double click on startup (Windows Batch file)

Open any browser localhost:8080 (8080 is default port number of Tomcat)

Now click on Manager App (Now it will ask user name and password)

Goto tomcat folder open conf folder -->tomcat-users open with any editer

Delete everything copy the below commands

<tomcat-users>

      <role rolename="manager-gui"/>

      <user username="tomcat" password="Tomcat" roles="manager-gui"/>

</tomcat-users>

(dont delete in you office servers this is for practices purpose)

Then goto bin folder -->double click on shutdown Windows Batch file

doubel click on startup Windows Batch file

Goto browser localhost:8080

click on Manager App

user username="tomcat"

password="Tomcat"

Deploying WAR file in Tomcat

Goto WAR file to deploy

Select WAR file to upload (select .War file)

click on Deploy

Now you can access you deployed Application.
